

Regulatory content from the APS Academy

There is a mix of training and resources available and on offer by the APS Academy, aimed at different skill levels:

Introduction to Regulation — eLearning

This course builds foundational capability for learners performing a regulatory role regardless of classification level.

Learners will gain a sense of identity and commitment to the role of a regulator.

Available via APSLearn: [View Course](#)

 Foundation Level

Regulatory Practice Essentials — Resources

Builds upon the eLearning 'Introduction to Regulation', introducing case studies and real world examples of regulation in practice.

Available via [APS Learning Bank](#)

 Practitioner Level

Evaluating Regulation Systems

Evaluating Regulatory Systems' is a microcredential developed in partnership with the University of Melbourne.

The course is ideal for regulatory practitioners who are seeking analytical tools, practical insights, and best practice frameworks and skills for regulators working in government, in any jurisdiction.

 Lead Level

Regulatory Professional Practice Support

These offerings allow participants to engage with other practitioners helping to ensure sound regulatory outcomes, improved effectiveness and defensible decisions. The resources and exercises found in this Program can be used as either a prequel or sequel to the above mentioned training, to further strengthen their understanding of a topic and the maturity level of their home agency.
