# GovAI

Who are we and what do we do?

GovAI

A whole-of-government service **currently being piloted** - designed to:

Enable and **accelerate AI adoption**

Support the **safe and secure** use of AI in government

**Efficient deployment** and **reduced duplication** of resources and investment

Support AI innovation through unification and collaboration

Provide access to AI tools for all agencies

GovAI has four key elements

Explore

Explore a catalogue of **AI Apps** and a **Use Case Repository** designed for the APS, aimed at boosting productivity, optimising workflows, and elevating service delivery.

Learn

Learn using a hands-on approach with the **Interactive Learning Environment** and access a **Knowledge Hub** of curated practical training and guidance material.

Build

Build applications in a purpose-built **AI hosting** environment including a sandbox for safe AI experimentation and find innovative solutions through the **industry showcase**.

Collaborate

Collaborate with other teams and individuals across the APS in the **collaboration space** and stay updated on AI news & events.

Enabling AI across the APS

Who will use GovAI

Beginner

CURIOUS

EXPLORING

UNSURE
