

# Single Agency delivery

## Capability for your agency

The APS Academy partners with agencies to deliver targeted, high-quality learning experiences that build capability where it matters most.

Single Agency delivery offers a flexible approach, bringing Academy courses directly to your people, when and where you need them.

### Why choose Single Agency delivery?

Single Agency delivery is ideal when your organisation needs to address specific capability gaps or upskill teams at scale.

With the APS Academy, you can:

- deliver targeted learning aligned to your agency's priorities
- build APS Craft capability, along with APS Professions and APS People skills
- provide a shared learning experience for teams to strengthen collaboration and consistency

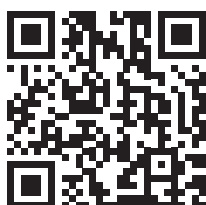

### Benefits at a glance

- **Streamlined delivery:** we manage all administration, including bookings and facilitator coordination
- **Cost-effective:** set delivery fee — often more efficient than individual enrolments
- **No procurement required:** simplified engagement with the Academy
- **Flexible format:** delivered face-to-face at your location or virtually via MS Teams

### How it fits with Academy offerings

In addition to Single Agency delivery, the APS Academy provides:

- **Mixed Agency courses:** open enrolment via APSLearn for individuals across the APS.
- **Specialist programs:** designed for senior leaders (e.g. SES and EL2 cohorts)
- **Learning resource toolkits:** curated resources supporting continuous, on-the-job learning.
